2005 SERVICE ACADEMIES SEXUAL ASSAULT SURVEY: ADMINISTRATION, DATASETS, AND CODEBOOK

Defense Manpower Data Center
Survey & Program Evaluation Division
1600 Wilson Boulevard, Suite 400, Arlington, VA 22209-2593

Acknowledgments

Defense Manpower Data Center (DMDC) is indebted to numerous people for their assistance with the *2005 Service Academies Sexual Assault Survey* (*SASA2005*), which was conducted on behalf of the Office of the Under Secretary of Defense for Personnel and Readiness (OUSD[P&R]). DMDC's survey program is conducted under the leadership of Anita Lancaster, Assistant Director for Program Management, and Timothy Elig, Chief of the Survey and Program Evaluation Division.

Policy officials contributing to the development of this survey include: Gail McGinn, Deputy Under Secretary for Plans (OUSD[P&R]); Darlene Sullivan, Office of the Assistant Secretary of the Army, Manpower and Reserve Affairs; Susan Roberts, Office of the Assistant Secretary of the Navy, Manpower and Reserve Affairs; and Maj Douglas Wall, Chief, United States Air Force Academy and Accessions Activities Division, Directorate of Learning and Force Development, Deputy Chief of Staff, Personnel. Other important contributors to survey development include researchers from the University of Illinois at Urbana-Champaign, Louise Fitzgerald, Fritz Drasgow, and Alayne Ormerod.

Survey-related logistics requirements were arranged by Jim Rodgers, SRA International, Inc. Mr. Rodgers coordinated with representatives from the Service Academies, who were invaluable in helping DMDC with reviews of the survey instrument and survey administration. DMDC is grateful to Dennis Kelly, LTC Michael Johnson, and Melissa Loubengeiger (U.S. Military Academy [USMA]); CAPT Glenn Gottschalk, USN (Ret.) and Susan Warren (U.S. Naval Academy [USNA]); and Kathleen O'Donnell and Lt Col Christopher Luedtke (U.S. Air Force Academy [USAFA]).

DMDC's Program Evaluation Branch, under the guidance of Eric Wetzel, Branch Chief, is responsible for the development of questionnaires used in DMDC's survey program. The lead developer of this survey was Rachel Lipari. In addition, she designed the unique presentation of complex items used in this tabulation volume.

She was supported in these efforts by Alan Jones and Paul Cook, SRA International, Inc., and Lee Howell, Consortium Research Fellow.

DMDC's Survey Technology Branch, under the guidance of James Caplan, Branch Chief, is responsible for monitoring survey administration, survey database construction and archiving, programming to code survey responses, and producing data for tabulations and briefings. The lead analyst of this survey was Margaret Emma Holland, SRA International, Inc. She was supported by Matthew Perry, Consortium Research Fellow, in these efforts. Mary Padilla and Deseree Stukes, SRA International, Inc., formatted and assembled this tabulation volume using DMDC's Survey Reporting Tool.

DMDC's Personnel Survey Branch, under the guidance of Richard Riemer, Branch Chief, is responsible for sampling and weighting methods used in the *SASA2005*. The lead statistician on this survey was Michael Paraloglou.

2005 SERVICE ACADEMIES SEXUAL ASSAULT SURVEY: ADMINISTRATION, DATASETS, AND CODEBOOK

Introduction

The *Human Resource Strategic Assessment Program* (HRSAP), located at Defense Manpower Data Center (DMDC), consists of both Web-based and paper-and-pencil surveys to support the personnel needs of the Under Secretary of Defense for Personnel and Readiness. These surveys assess the attitudes and opinions of the entire Department of Defense (DOD) community—active, reserve, civilian employees, and family members—on a wide range of personnel issues. The 2005 Service Academies Sexual Assault Survey (SASA2005) is the second of five congressionally mandated surveys designed to track sexual assault and sexual harassment issues at the Service Academies in response to the National Defense Authorization Act (NDAA) for Fiscal Year (FY) 2004. The first survey in this series was conducted in 2004 by the Department of Defense (DoD) Inspector General (IG)1.[1] To obtain data on sensitive topics and provide anonymity to respondents this project used a paper-and-pencil survey administration

Overview of Report

The next section of this report describes the procedures used to develop the instrument, design the sample, conduct the survey, process the data and prepare analysis weights. Along with the survey instrument and letters inviting the sampled to participate (Appendices A and B, respectively), the methods section is the documentation of how the survey was conducted.

The third section of the report describes the survey analysis file layout and key variables. This section and the remaining appendices (C-K) address issues in the analysis of the survey data. The topics covered are:

- Conventions for variable naming and construction are introduced in this section with details given in Appendices C (annotated questionnaire), D (explanation of coding), and I (explanation of key analytic variables).
- Appendices E, F and G give the names and values of all variables in the basic-survey dataset and the Privacy-Act confidential variables.
    - Appendix E lists the variables in alphabetic order and flags the Privacy-Act confidential variables with an aspheric (*).
    - Appendix F lists the variables in the order that they appear in the dataset. It groups variables with the same function together, i.e., all variables used for weighting are located together. The determination of what section variables fall into is discussed.
    - Appendix G provides a frequency of each variable with the SAS values, OS flat file values and SAS labels in the same order that the variables are

[1] Details are reported in Office of the Inspector General of the Department of Defense (2005).

listed in Appendix F. In addition to the variables available on the basic survey file, Appendix G contains details for the confidential variables that had to be suppressed to preserve the privacy of survey respondents and nonrespondents. Confidential variables are identified and listed in Appendices E and F. Key concepts required for the analysis of complex survey data and the structure of records in the survey analysis files are introduced in this section.

- Examples of analyses are given in Appendix J.
- The SAS code used to construct the analytic variables are included in Appendix I.
- Appendix H provides the record layout for the basic survey flat file.
- Appendix K summarizes questionnaire items used in recent DMDC surveys.

Method

Survey Instrument

The SASA 2005 was modeled on its predecessor fielded by the Department of Defense Inspector General. A copy of the survey is provided in Appendix A. The survey was subdivided into the following eight topic areas:

1. Background Information – Service Academy, gender, and Academy class year.
2. Values – Values important to professional life at one's Academy and opinions about student conduct and behaviors.
3. Training – If they received training, the effectiveness of training received in sexual assault and sexual harassment.
4. Academy Climate – Gender treatment, character and conduct, leadership and support, willingness to report incidents, consequences of reporting, accountability and understanding of sexual assault and sexual harassment related actions (reporting, receiving assistance, etc.).
5. Personal Experiences – Experiences of unprofessional, gender-related behaviors, sexual harassment, and sexual assault since June 2004.
6. One Situation With the Greatest Effect – Circumstances pertaining to experiences of sexual assault, including characteristics of offenders, to whom behaviors are reported and, if applicable, students' satisfaction with the complaint process and outcome.
7. Reasons for Not Reporting – Reasons a student did not report an incident of sexual assault.
8. How Are We Doing – Sexual harassment and sexual assault as more or less of a problem since becoming a student, comparison of sexual harassment and sexual assault with civilian colleges/universities.

A paper-and-pencil instrument was fielded to insure the confidentiality of the respondents. The surveys did not have any identifying or matching feature (e.g., a litho code) to

match survey responses to sampled students. The instrument contained instruction text to explain skip patterns.

Sample

The sample consisted of 2,049 female and 3,287 male students drawn from the sample frame constructed from student rosters provided to DMDC by each Academy. The Academies' rosters attempted to remove students who were ineligible to take the survey (i.e., non-U.S. citizen or visiting students). A single-stage, a nonproportional stratified random sampling procedure was employed to ensure adequate sample sizes for the reporting categories. This process necessitated taking a census of the female students across Academy.

Stratification Variables

The sampling frame was constructed using the three stratification variables listed in Table 1. These three variables were used to create stratification cells. A single variable, V_STRAT, was created as an index variable for the strata.

Table 1.
Stratification Variables

Dimension of Stratification	**Levels**
Gender	Male
	Female
Academy	U.S. Naval Academy
	U.S. Military Academy
	U.S. Air Force Academy
Class	2005
	2006
	2007
	2008

Researchers identified subgroup breakouts (i.e., domains) that would be important when survey results were provided to policy officials (Table 2). These reporting domains appear in the Tabulation Volume (DMDC Report No. 2005-017) and the Overview Report (DMDC Report No. 2005-018).

Table 2.
Factors Defining Key Reporting Domains

Factors	Levels
Gender	Male
	Female
Academy	U.S. Military Academy
	U.S. Naval Academy
	U.S. Air Force Academy
Class	2005
	2006
	2007
	2008
Sexual Harassment	Experienced SH
	Not experienced SH
Sexual Assault	Experienced SA
	Not experienced SA

After the strata and domains were constructed, the total sample size and its allocation to the sampling strata were determined. The following formula was used to determine the allocation for each stratum:

$$n = \frac{NZ^2 p(1-p)}{e^2(N-1) + Z^2 p(1-p)}$$

Where: N = Stratum Size

Z = 1.96 (2 SD)

p = 0.5 (prevalence rate)

e =0.05 (precision)

Then the resulting allocation was multiplied by the inverse of the response rate (obtained from the SASA 2004 survey) to come up with the final sample size.

Constructing the Frame and Drawing the Sample

The Service Academies provided DMDC student rosters to develop the sampling frame, constructing strata, and determine the sample size and allocation. The Academies' rosters included students who were ineligible to take the survey (i.e., non-U.S. citizen or visiting students). During survey administration the ineligibles were identified and recoded for weighting procedures. The population definition resulted in a sampling frame with 4,078 students from the USMA, 4,233 from the USNA and 4,106 from USAFA. A non-proportional stratified, single stage random sample of 1,688 USMA cadets, 1,789 USNA midshipmen and 1,859 USAFA cadets were selected. Table 3 presents a summary of the sample allocation by Academy.

Table 3.
Sample Allocation for the 2005 Service Academies Sexual Assault Survey

	Total	U.S. Military Academy	U.S. Naval Academy	U.S. Air Force Academy
Sample				
Total	5,336	1,688	1,789	1,859
Gender				
Males	3,287	1,070	1,096	1,121
Females	2,049	618	693	738
Class				
2005	1,266	407	415	444
2006	1,246	394	419	433
2007	1,343	434	448	461
2008	1,481	453	507	521

Note: Counts for unknown are not included.

Respondents

Sample Losses

The original sample file contained 5,336 records. Losses to the drawn sample are listed in Table 4 and reviewed here. Sample members were lost from the sample for three main reasons: (1) ineligibility for the survey (exchange student, separated from the Academy or a foreign national), (2) an inability to locate the sample member, and (3) refusal to participate in the survey or other failure to respond to the survey.

A total of 34 sample members (0.66%) were lost from the final sample through classification as ineligible. Elimination of ineligibles resulted in decreasing the sample to 99.34% (N=5,302) of its original size.

Table 4.
Final Sample Relative to Drawn Sample

	Sample Size n	% of Drawn Sample
Drawn sample	5,336	100%
Ineligible on Academy roster files	34	
Total: Ineligible	34	
Eligible sample	5,302	99.36
Not located	82	
Total not located	82	
Located sample	5220	97.82
Returned blank	542	
Did not complete 50% of survey items	618	
Skipped critical questions	702	
Total: Nonresponse	708	
Usable responses	4512	88.30

Losses attributable to ineligibility resulted in a sample that was 99.36% of the drawn sample. Losses attributable to unlocatability resulted in a sample that was 97.82% of the drawn sample. Individuals in this remaining sample may be further categorized as nonrespondents versus respondents. Nonrespondents included the following groups: 542 sample students who returned blank surveys, 618 sampled students who did not complete 50% of survey items and 702 sampled students who skipped critical questions.[2]

Respondents included all sample students who completed 50% of applicable questions and the critical questions[3]. At the conclusion of the survey fielding, 4,512 eligible, locatable sample students had returned usable surveys.

Since this was an anonymous paper survey, the dataset only has values for sampled students that were briefing and opted to take or not take the survey. The dataset does not have records for the 34 ineligible or the 82 who could not be located.

Location, Response and Completion Rates

Beginning in 1995, DMDC standardized its methods for calculating response rates and completion rates using procedures patterned after those advocated by the Council of American

[2] These nonresponse categories are not mutually exclusive. If a sampled member returned a blank survey, then they also did not complete 50% of survey items and did not answer the critical questions.
[3] Applicable questions are those to be completed by all respondents. This excludes items that could be skipped depending upon prior answers.

Survey Research Organizations (CASRO). CASRO noted that varying operational definitions of response rates can lead to problems or confusion (e.g., when awarding contracts requiring pre-specified response rates or when interpreting the results of a survey). As a result, CASRO formed a task force to recommend guidelines for standardizing the operational definitions of response rates. More specifically, the new DMDC procedures closely follow CASRO's Sample Type II design (see Council of American Survey Research Organizations, 1982).

Table 5 provides location, response, and completion rate information. The location rate is defined as the proportion of eligible sample students that were locatable. The response rate is defined as the proportion of eligible sample students that returned usable surveys. The completion rate is defined as the proportion of the located sample that returned usable surveys.

Table 5.
Location Rates, Response Rates, and Completion Rates

	Observed Operational Rates	Weighted Operational Rates
Location rate for eligible	98%	99%
Completion rate for eligible	86%	86%
Response rate for eligible	85%	85%

Survey Development and Administration

Paper-and-pencil Survey

Data were collected at each Academy in April 2005. A team of survey administrators and proctors from DMDC worked closely with staff from each Academy to administer the paper-and-pencil survey in group sessions. Separate sessions were held for female and male cadets/midshipmen. In addition to the DMDC staff, an officer from the same Service as the Academy briefed the cadets/midshipmen on the purpose and importance of the survey at the beginning of each session. These Service briefers were not affiliated with the Academies. After checking in and upon entering the briefing room, each cadet/midshipman was handed a survey, an empty standard 9 x12 Brown Kraft envelope, and a pen. An Academy-specific information sheet was also provided. This handout contained information on where cadets/midshipmen could obtain help if they became upset or distressed while taking the survey or afterwards. At the briefing, cadets/midshipmen were told the purpose for the survey and the importance of participation, but completion of the survey itself was voluntary. Cadets/midshipmen could leave the session at the completion of the mandatory briefing if they did not wish to take the survey. Cadets/midshipmen returned surveys, in sealed envelopes, to survey staff as they exited the session. This resulted in one returned survey per cadet/midshipman briefed. This resulted in one returned survey per student briefed. Survey booklets were collected by DMDC staff and shipped to the survey operations contractor for scanning and data compilation.

Survey Administration

Each Academy was given the list of sampled students for the SASA2005. Each Academy developed procedures to notify the sampled students and assigned them to sessions for the briefing and the option to participate. The Academy communications can be categorized as three forms: 1) letters to students and Academy staff informing them that the survey will field soon, 2) the sampled students received notification from the Academy that they were selected for the sample, and 3) notification from the Academy that they missed their assigned session time. The DMDC survey administration staff created a student check-in process from the Academy session assignments. The student checked in with DMDC staff and were then instructed which room to enter for the briefing. Males and females were briefed in separate rooms. Upon entering the briefing rooms, students were greeted by DMDC staff and handed the survey packet. Upon leaving the briefing room, students turned in their surveys to DMDC staff and were thanked for participation.

The DMDC survey administration staff supplied lists of "no-shows" to Academy staff. No-shows are students who were assigned to one of the sessions and failed to check-in. The Academy staff sent emails to the no-shows reminding them that the briefing was mandatory. The no-show students were instructed to meet with DMDC survey administration staff to arrange a time to complete the briefing.

Table 6.
Survey Administration Sessions per Academy

	U.S. Military Academy		U.S. Naval Academy		U.S. Air Force Academy	
	Male	Female	Male	Female	Male	Female
Number of session	24	22	37	38	30	29
Average student per session	43	27	29	18	37	25

Processing Returned Surveys

Paper-and-pencil Surveys

The operations contractor processed all survey information according to DMDC approved administration plans and coding schemes. Surveys were image scanned.

Upon receipt of the surveys from the Academies all returned surveys – whether completed, partially completed, or blank – were logged in and opened by the operations contractor. If the envelope contained the survey booklet and other materials (e.g., extra comments, photographs, non-relevant items), the operations contractor separated it from the survey. Bundles of this type of correspondence (white mail) were sent to DMDC by regular surface mail or UPS ground after all surveys were received. If the white mail appeared to be urgent, the operations contractor contacted DMDC to determine how it should be handled.

Survey booklets were batched for Image scanning and assigned a batch number. The booklets were cut to separate all the pages, stacked in page/booklet order on the shelves of a cart, and forwarded for scanning. As the surveys were scanned, the batch number and a serial number (unique to each survey) were printed on each page of the survey.

The surveys were machine edited for light marks, multiple marks, and alignment. Damaged forms were repaired, if possible, and scanned with non-damaged forms. If it was not possible to scan the documents, they were batched separately and key entered.

DMDC Coding Scheme

To convert the raw data into the item scores that appear in the basic data file, DMDC provided the operations contractor with the coding notes (contained in Appendix D) and an annotated copy of the survey form (Appendix C). Every attempt was made to capture all information from completed surveys and preserve the data so that secondary analysts can later create variables that were not anticipated by DMDC researchers. To accomplish these goals, DMDC subscribes to a variety of coding conventions for all of its surveys. See Appendix D for in-depth coverage of these coding conventions.

DMDC uses "forward" coding methodology when coding inconsistent answers in items with skip patterns. Data on the starting question (parent) were accepted as marked. Data for subsequent items within the skip pattern (children) were edited to be consistent with the parent question. An unedited version of each item was preserved in a confidential dataset. By preserving the unedited data, recoding can be done if ever required.

Coding or Keying Open-Ended Items

The operations contractor keyed all verbatim other-specify and 100% of open-ended comments. Identifiers (proper names, addresses, e-mail addresses, phone numbers, locations, or Social Security Numbers) were replaced with generic terms. Obscenities were keyed verbatim. If an open-ended comment began on the survey form and continued on an attachment, the operations contractor keyed the entire comment. The operations contractor delivered the written open-ended responses in a flat file. The comments were linked by Batch and serial number to the scanned file. A flag indicating the presence of a comment appeared in the scan data record and was used to help ensure that all comments were keyed. The comments were provided as separate records by item number and combined into one comment file.

Fifty-record Check

After receiving and scanning the first 50 returned records, the operations contractor performed a "50-record check." The purpose of this check is to test the coding scheme. DMDC checked the resulting data to determine if there were any unanticipated problems in the coding procedures (e.g., respondents were consistently answering in an unexpected manner). Minor corrections to these procedures were necessary as a result of this check and were reviewed by DMDC prior to production of the initial SAS® dataset. At the completion of the 50-record

check, the operations contractor compiled the full set of returned surveys. The data were then cleaned and edited.

Survey Analysis Files

This section (a) provides an overview of requirements for analysis of the data, (b) documents the structure of survey analysis files created for the 2005 Service Academy Sexual Assault survey, (c) describes the assembly of the analysis files, and (d) provides an overview of the variables in the survey analysis files.

Estimation

Data were collected from a non-proportional stratified, single stage random sample for males and a census of the females. Responses were weighted up to population totals adjusting for differential sampling and response rates in demographically homogenous groups. In general, the procedures used to compute sample estimates of population parameters (including population totals, means, proportions), tests of hypotheses, regression relations, and their associated variances are derived from the probability structure that gives rise to the observations. As with other surveys involving complex probability structures, most of the parameter estimates of interest in this survey take the form of non-linear statistics. Examples include domain means and proportions where the denominator values are unknown and must be estimated from the sample data. The estimator takes the form of a ratio of random variables (i.e., the ratio of the estimated numerator and denominator totals or counts). In general, ratio estimates are not unbiased and their variances cannot be expressed in closed form. The variances are, therefore, approximated. The bias in a ratio estimate depends on the variance associated with the denominator total or count and can usually be ignored in samples having a large number of observations. As a working rule, the bias may be assumed negligible if the number of observations on which the estimate is based exceeds 30 or is otherwise large enough so that the coefficient of variation [SE(x)/x] of the denominator is less than .10 (cf., Cochran, 1977, pp. 153-165).

Approximations for the variances commonly take the form of Taylor series linearizations or replicate methods such as those based on resampling methods. Variables have been included in the analyses files so that variance estimates can be based on Taylor series linearizations computed by SUDAAN[4] for a stratified, without replacement design.

Many of the standard statistical software packages, such as SPSS[5] and older versions of SAS,[6] do not properly compute variance estimates from weighted data that were collected with a design other than simple random sampling. Variables have been included in the analysis file so that Taylor series estimates can be made with SAS PROC SURVEYMEANS and PROC SURVEYREG.

[4] SUDAAN® is a registered trademark of Research Triangle Institute, Research Triangle Park, NC, USA.
[5] SPSS® is a registered trademark of SPSS Inc., Chicago, IL, USA.
[6] SAS added survey procedures in Version 7, expanding them in releases 8.0 and higher.

Analyzing the dataset with the proper use of the appropriate eligibility indicator (ELIGFLGW) and analysis weight (FINALWGT) in standard statistical programs will result in accurate point estimates but will not result in accurate variance estimates. Wolter (1985) provides a detailed discussion on methods used for variance estimation from sample surveys including replication, Taylor series approximation, and analytic methods.

Data Structure

Care was taken in the preparation of the survey analysis files to provide access to data from the survey with sufficient information for accurate estimations, while meeting requirements for participant and non-participant anonymity. As described below, some detailed variables have been deleted from the Basic-Survey file either because (a) they are typically needed only to analyze survey methods and not needed to analyze the survey data or (b) they provide too great a chance of identifying an individual.

In addition to a basic-survey file, a confidential file (containing a more complete set of variables than the Basic-Survey file) has been prepared for internal DMDC use. Files were prepared as SAS and SPSS system files. An ASCII (Operating System or OS) flat file was prepared from the basic SAS system file. File names are indicated in Table 7.

Table 7.
Analysis File Names

Type of File	File Name
Basic survey File – SAS	SASA05B.SAS7BDAT
Basic survey File – SPSS	SASA05B.POR
Basic survey File – OS	SASA05B.DAT
Full survey File – SAS	SASA05C.SAS7BDAT

The structure of the confidential file is shown in Figure 3. The confidential file contains the basic-survey file plus additional Privacy Act confidential variables.

All variables in the confidential file are documented in this report. Appendices E and F list all variables with a notation to indicate which variables are confidential, and show where each variable is documented. Variables that appear in collapsed form in the Basic-Survey part of the file and in a fuller version only in the confidential file are discussed later.

Analyses

Both the confidential file and basic-survey file contain 5,220 records, one for each located sampled individual. As depicted in Figure 1, these 5,220 records can be divided into 2 subgroups.

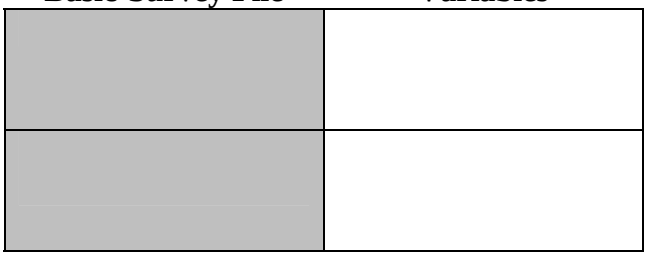

Assignment of a record to the other two subgroups was based on whether (a) an individual returned a “completed” survey; and (b) the person was eligible to be included in the

population of interest. Final eligibility was limited to students attending the Academy in April 2005 excluding foreign nationals and visiting students.

Records required for analyses are those in the *Known Ineligibles* and *Eligible Respondents* subgroups. Both the *Eligible Respondents* (ELIGFLGW = 1) and *Known Ineligibles* (ELIGFLGW = 2) are included because both types of records were used to develop weights that sum to the population total, and both types of records are needed to compute accurate variance estimates by the Taylor series linearization method implemented by SUDAAN and SAS PROC SURVEYMEANS.

To analyze the Web responses, the analytic weight, FINALWGT was used with the file subset ELIGFLGW.

Figure 1.
The Structure of the Confidential File

Note. The shaded portion represents the subset of the data typically required for analysis.

Variables in the Survey Analysis Files

Basic-Survey File

The variables in the Basic-Survey file fall into four categories: (1) derived from survey responses, (2) created by DMDC for analysis (3) created by the operations contractor to document survey operations, and (4) created to analyze the weighted dataset. Variables are grouped in these categories in Appendix F.

Information gathered on the survey. These variables came directly from the survey or were constructed using only information from the survey. There is at least one variable for every item in the survey except for a few items that had to be removed to preserve confidentiality. The annotated questionnaire (see Appendix C) contains the item names, the values used to code the pre-specified alternatives, and references to applicable coding notes in Appendix D.

Although the first part of Appendix D extensively documents the conventions that DMDC uses to name survey variables, a brief overview of the naming convention is also given here. In general, the survey-derived variables can be classified as variables that begin with either "SB," "SR," or "X."

The naming of "SB" variables is reviewed using the example variable, "SB004A." For the *2005 Service Academy Sexual Assault Survey*, variables names begin with "SB" to denote the population (Service Academy) and the version of survey (second survey) in this series. The ending three or more numbers or letters correspond to the questionnaire item. In this example, the third through fifth digits indicate the main question number (004) and the sixth digit (if any) indicate the sub-question item, such as (in this example) item A from a list of items in question 4.

The "SR" variables are a set of primarily demographic items that are identically named across all DMDC surveys. The "SR" serves as a mnemonic for self-report with the remainder of the name indicating the data being collected. For example, "SRACAD" is the variable name for the item that asks sample students what Academy they attend. Although all survey data are self-reported, the "SR" is used to distinguish survey-reported information from DMDC-provided information (e.g., "SRACAD" from the survey versus "CACAD" from DMDC survey administration records). "XACAD" used the values of "CACAD" when "SRACAD" is missing. "X" variables typically involve imputation for missing data and, like "SR" variables, are intended to be consistent across DMDC surveys. When possible, "X" is reserved to create special crossing (marginal) variables for key analyses.

Variables constructed for analysis. Certain demographic variables, including some information collected on the survey, had to be censored to preserve the confidentiality promised to survey respondents and nonrespondents. For example, SB023AR is a recoding of SB023A. An "R" as the last letter of a variable listed in Appendices E and F is an indication that the variables may have been recoded to create special analysis variables and that a more complete variable is available only on the confidential analysis file.

Certain key demographic variables were constructed for DMDC analyses. These analytic variables, starting with "X," are based primarily on self-reported information from the survey. Typically, where the self-reported information was missing on important demographics (e.g., gender and Academy) data were imputed from survey administrative records.

Appendix I also documents many of the decisions made in the analyses reported by DMDC (2005). For a large number of survey items, analysts must make decisions on the treatment of special codes used to indicate inconsistencies in the survey data, especially on respondent failures to follow skip pattern directions.

Information on operations. The DMDC-provided identification number, SASA05ID, is unique and is used to identify responses as they are processed. Other variables are created by the operations contractor but are too detailed to be in the Basic-Survey file.

Information on weighting. Derivation of weights is discussed in detail in DMDC (2005b) Appendix B. See Appendix J for examples of analyses using these variables:[7]

ELIGFLGW	Eligibility Flag
FINALWGT	Final Weight
V_STRAT	Strata
TOTAL	Stratum Totals

Confidential File

In addition to variables on the basic-survey file, the full-survey file also has five additional categories of variables: (1) the uncensored version of survey items that appear in a collapsed form in the basic-survey section, (2) variables created by DMDC for analysis, (3) detailed variables created by the operations contractor to document operations, (4) demographic data collected at the time of fielding, and (5) detailed variables used in weighting. Variables are grouped in these categories in Appendices E and F.

Confidential variables—survey data. This section of the confidential file contains the original full version of survey variables that had to be recoded for the basic-survey file to preserve confidentiality. To the extent possible, recoded versions of these variables are in the Basic-Survey file section in variables constructed for analysis.

Confidential variables—analysis data. This section of the confidential file contains the original full version of analytic variables constructed by DMDC. To the extent possible, recoded versions of these variables are in the Basic-Survey file section for variables constructed for analysis.

Confidential variables—operations data. This section of the confidential file contains operational variables created by the operations contractor. These variables are useful for methodological studies and/or were used in determining eligibility and response status.

The identifying variables describe how the record was processed once a survey was returned. The variables BATCH, SERIAL, and LITHO uniquely identify each returned survey. BATCH, SERIAL and LITHO are the codes printed on the survey during scanning to identify the scan batch number, scan order of each survey and uniquely identify each survey. These numbers can be used to retrieve the paper copy of a survey for a short time after it has been scanned (e.g., should researchers want to check electronically-stored information against the respondent's answer on the paper survey). DENTDATE is the date the survey was scanned and INRECNO is the unique identification number assigned to each record.

The classification variables describe how individual sample member's records were grouped and indexed. FLAG_FIN indicates the final disposition status of a sample member (i.e.,

[7] Two additional variables required for SUDAAN are on the dataset but not discussed in Appendix J: NPSTRAT, poststratification population counts; and, PSTRATA, poststratification strata.

survey returned, blank survey returned, not locatable, or no return). Several other classification variables were used to categorize a survey's final disposition. These variables are: BLKREAS, SCSINEL, and REFUSE. BLKREAS codes the reason given by the sample member for returning a blank survey, SCSINEL indicates the reason given by the sample member for being ineligible, and REFUSE indicates whether a sample member refused to complete a survey.

Confidential variables—sampling and record data. This section of the confidential file contains administrative file variables.

Confidential variables—weighting. This section of the confidential file contains variables used in analysis of non-response and in the construction of the weights.

Using Appendix G

Regardless of whether analysts use all or only portions of the database, all analysts should replicate the results found in the tables in Appendix G. It is only by replicating these results that analysts can be sure that they are reading the data correctly. An annotated example of an Appendix G table is listed in Figure 2.

Figure 2.

Annotated Example of a Table from Appendix G

[1]SASA 2005 Academies
Information Gathered on the Survey

[3]As a cadet/midshipman, which of the below listed values are most important to your professional life at your Academy? Indicate your top three values in order of importance (Mark the most important value in the "1st" column, the second most important in the "2nd" column, and the third most important in the "3rd" column).

[2]SB004A Accountability

[4]OS DATA

COLS	LENGTH
0001-0002	2

[5]SAS DATA

FORMAT NAME	TYPE	LENGTH	INFORMAT
SB034_	NUM	3	STDOS2

[6]FREQ	[7]PERCENT	[8]OS VALUE	[9]SAS VALUE	[10]MEANING
689	13.2	-9	.	No response
108	2.1	1	1	Ranked first
146	2.8	2	2	Ranked second
148	2.8	3	3	Ranked third
4129	79.1	60	60	Not selected
[11]5220	100.0	TOTALS		

[12]SB004A, SB004B, SB004C, SB004D, SB004E, SB004F, SB004G, SB004H, SB004I, SB004J, SB004K, SB004L, SB004M, SB004N, SB004O, SB004P, SB004Q, and SB004R were edited from the form that they appeared in the survey instrument. If the respondent did not select an item as a first, second or third, choice then their response is set to 60 (Not selected). Here is how they are edited:
array q4r SB004A SB004B SB004C SB004D SB004E SB004F SB004G SB004H SB004I SB004J SB004K SB004L SB004M SB004N SB004O SB004P SB004Q SB004R ; do over q4r; if q4r not in (1,2,3,.A) then q4r = 60; end;

[13]G-1

1. Codebook title and item text. The codebook title is the same for every table in Appendix G of this codebook. It lists both the general study and the specific survey form being summarized. If applicable, the indented text under the title presents the verbatim question or instructions that accompany a specific item in the survey.

2. Variable name. The variable name for a survey item is up to eight characters in length and corresponds to the variable name that is used in the SAS®-based, Basic-Survey data file. The conventions for naming survey-derived variables are documented in Appendix C. Appendix F contains a full listing of the Basic-Survey file variables, as well as short descriptions of what the variables document.

3. Survey item text. For survey items, this text is the verbatim item wording. For other variables, this text provides a verbal description of the variable.

4. Location of the item on the OS data file. This block provides the location of the variable on the OS (ASCII) data file. The OS data block documents (a) the starting and ending column numbers where the data are stored and (b) the number of columns that the data occupy.

5. SAS® data file information. This block indicates format name, variable type, length and informat of the data in the SAS® data file. The last block indicates the informat appropriate for reading the data from the OS data file.

6. Counts of item value responses. This column indicates the number of sample students who fall into the category corresponding to each value for the variable. The count provided for each variable value should correspond exactly to those that analysts would obtain when running unweighted frequencies on all 5,220 records in the accompanying database. Before running complex statistical analyses, analysts are encouraged to re-create these frequency tables. Re-creating the counts minimally ensures that the data are being correctly read by the analysts' computers and programs.

7. Respondent percentages for each value. This column indicates the percentage of sample students who marked each variable value. The percentages are calculated by dividing the row value in the "FREQ" column by the total listed at the bottom of the "FREQ" column. The percentages provided for each variable value should correspond exactly to those that analysts would obtain when running unweighted frequencies on all 5,220 records in the accompanying database.

8. Response OS values. This column presents the OS (ASCII) code for the actual or re-coded response values for each survey item. Further details on the values in this column are found in either the annotated survey form or in Appendix D. For example, all negative values are found in Appendix D.

9. Response SAS® values. This column presents the SAS® code for the actual or recoded response values for each survey item. Further details on the values in this column are found in either the annotated survey form or in Appendix D. For example, all negative values are found in Appendix D.

10. Explanation of the item value codes. This column presents brief verbal explanations of the OS and SAS® coding for each survey item. If the coded information corresponds to survey response alternatives, the text in the table is the verbatim response from the survey instrument. More detailed explanations are found in either the annotated survey form or in Appendix C.

11. Total of response frequencies and percents. The number appearing at the bottom of the "FREQ" column is the total number of sample students in the Basic-Survey file. This number is the same for every table in this codebook. That is, every sample member in the database is accounted for on every variable even if the variable indicates only that the information was missing for that sample member. The number appearing at the bottom of the "PERCENT" column is typically 100.0. Rounding error, however, occasionally causes the total percentage to be slightly above or below 100.0.

12. Messages to analysts. The messages alert analysts to situations specific to a variable including (a) rounding errors resulting in a total percentage other than 100 percent; (b) the variable having values that are "too numerous to list;" (c) extraction of the variable from another specified database; (d) creation of the variable from two or more variables specified in the message; and (e) further clarification of the survey item corresponding to the variable.

13. Codebook page number. This is the Appendix G page number corresponding to a specific variable. Appendix E and F identifies the page number in Appendix G where the variable can be found.

COMPLETION INSTRUCTIONS

- **Please take your time and select answers you believe are most appropriate.**
- **Please PRINT where applicable. Do not make any marks outside of the response and write-in boxes.**
- **If you need more room for comments, use the back page or a blank piece of paper.**
- **Place an "X" in the appropriate box or boxes.**

RIGHT ☒ **WRONG** ☑ ○

- **To change an answer, completely black out the wrong answer and put an "X" in the correct box as shown below.**

CORRECT ANSWER ☒ **INCORRECT ANSWER** ■

ACRONYM LIST

AFOSI - Air Force Office of Special Investigations
AOC - Air Officer Commanding
BCT - Basic Cadet Training
CASIE - Cadets Advocating Sexual Integrity and Education
CID - US Army Criminal Investigation Command
Co Officer - Company Officer
DoD - Department of Defense
MTL - Military Training Leader
NCIS - Naval Criminal Investigation Service
OIG - Office of the Inspector General
OSI - Office of Special Investigation
SAVI - Sexual Assault Victim Intervention
SEL - Senior Enlisted Leader
SJA - Staff Judge Advocate
TAC - Tactical Officer

PRIVACY INFORMATION

This notice informs you of the purpose of this survey and how the findings of this survey will be used.
AUTHORITY: Section 527 of the National Defense Authorization Act of 2004.
PRINCIPAL PURPOSE: The purpose of this survey is to determine the extent to which sexual assault/harassment is occurring among cadets/midshipmen at the Service Academies and to evaluate the effectiveness of each Service Academy's sexual assault/harassment policies, training, and procedures. The survey is intended to serve as a benchmark by which senior DoD officials can track sexual assault/harassment trends over time. Reports will be provided to the Office of the Secretary of Defense, each Military Department, and the Service Academies. Findings will be used in reports and testimony provided to Congress. Some summary statistical findings may be published by Defense Manpower Data Center (DMDC) in professional journals, or presented at conferences, symposia, and scientific meetings.
ROUTINE USES: None.
DISCLOSURE: Providing information on this survey is voluntary and anonymous. There will be no effort to trace any information back to an individual. There is no penalty if you choose not to respond. However, maximum participation is encouraged so that data will be complete and representative.
STATEMENT OF RISK: The data collection procedures are not expected to involve any risk or discomfort to you. The only risk to you is accidental or unintentional disclosure of any identifying data you provide. However, DMDC has a number of policies and procedures to ensure that survey data are kept anonymous and protected. If you have any questions about this survey, please contact SASurvey@osd.pentagon.mil.

BACKGROUND INFORMATION

1. To which Service Academy have you been appointed?

- ☒ United States Military Academy
- ☒ United States Naval Academy
- ☒ United States Air Force Academy

2. Are you . . . ?

- ☒ Male
- ☒ Female

3. What is your Class year?

- ☒ 2005
- ☒ 2006
- ☒ 2007
- ☒ 2008

VALUES

4. As a cadet/midshipman, which of the below listed values are most important to your professional life at your Academy? ***Indicate your top three values in order of importance (Mark the most important value in the "1st" column, the second most important "2nd" column, and the third most important "3rd" column).***

	1st	2nd	3rd
Accountability	☒	☒	☒
Achievement	☒	☒	☒
Ambition	☒	☒	☒
Commitment	☒	☒	☒
Courage	☒	☒	☒
Effectiveness	☒	☒	☒
Efficiency	☒	☒	☒
Excellence	☒	☒	☒
Friendship	☒	☒	☒
Honor	☒	☒	☒
Integrity	☒	☒	☒
Loyalty to Country	☒	☒	☒
Money	☒	☒	☒
Power	☒	☒	☒
Respect	☒	☒	☒
Selfless service	☒	☒	☒
Spiritual faith	☒	☒	☒
Tolerance	☒	☒	☒

5. Based on your experience, to what extent do you agree or disagree with the following statements?

	Strongly disagree	Disagree	No opinion	Agree	Strongly agree
a. Cadets/midshipmen at my Academy adhere to the Honor Code/Concept, even if they know they won't get caught violating it	☒	☒	☒	☒	☒
b. Cadets/midshipmen adhere to significant Academy rules and regulations, even if they know they won't get caught violating them	☒	☒	☒	☒	☒
c. Cadets/midshipmen hold other cadets/midshipmen accountable to the Honor Code/Concept	☒	☒	☒	☒	☒
d. Honesty in all things is expected and reinforced at my Academy	☒	☒	☒	☒	☒
e. I am morally obligated to abide by the oath I took to support and defend the Constitution of the United States, regardless of the consequences to me	☒	☒	☒	☒	☒
f. I have felt pressure from others at my Academy to compromise moral standards because of loyalty to friends/peers	☒	☒	☒	☒	☒
g. I have felt pressure from others at my Academy to compromise moral standards in order to meet academic or training objectives	☒	☒	☒	☒	☒
h. Circumstances determine whether it is right or wrong for a cadet/midshipman to compromise his or her moral standards	☒	☒	☒	☒	☒
i. I am committed to living by moral standards that exceed those of society at large	☒	☒	☒	☒	☒
j. As a cadet/midshipman, it is important for me to meet the same exemplary conduct and leadership standards required of a commissioned officer	☒	☒	☒	☒	☒
k. My commitment to living by exemplary conduct and leadership standards has been reinforced by attending the Academy	☒	☒	☒	☒	☒

6. To what extent do you agree or disagree with the following statements? The following behaviors would disrupt good order and discipline at my Academy:

	Strongly disagree	Disagree	No opinion	Agree	Strongly agree
a. Violating the Honor Code/Concept	☒	☒	☒	☒	☒
b. Not reporting Honor Code/Concept violations	☒	☒	☒	☒	☒
c. Favoritism based on gender	☒	☒	☒	☒	☒
d. Engaging in prohibited relationships/fraternization	☒	☒	☒	☒	☒
e. Cadets/midshipmen dating each other at the same Academy	☒	☒	☒	☒	☒
f. Consensual sex between cadets/midshipmen on Academy grounds	☒	☒	☒	☒	☒
g. Consensual sex between cadets/midshipmen off Academy grounds	☒	☒	☒	☒	☒
h. Excessive use of alcohol/drunkenness	☒	☒	☒	☒	☒
i. Illegal drug use or the abuse of prescription drugs	☒	☒	☒	☒	☒
j. Viewing pornography or other sexually graphic content (images or movies)	☒	☒	☒	☒	☒

TRAINING

7. Have you had any training since June 2004 on topics related to sexual harassment?

- ☒ Yes
- ☒ No

8. In your opinion, how effective was the training you received in <u>actually reducing/preventing</u> behaviors which might be seen as sexual harassment?

- ☒ Very effective
- ☒ Moderately effective
- ☒ Slightly effective
- ☒ Not at all effective
- ☒ Does not apply, I have not had sexual harassment prevention training

9. Have you had any training since June 2004 on topics related to sexual assault?

- ☒ Yes
- ☒ No

10. In your opinion, how effective was the training you received in actually reducing/preventing incidents of sexual assault?

- ☒ Very effective
- ☒ Moderately effective
- ☒ Slightly effective
- ☒ Not at all effective
- ☒ Does not apply, I have not had sexual assault prevention training

11. Do you understand the following?

	Yes	No	Not sure
a. The difference between sexual harassment and sexual assault	☒	☒	☒
b. How to report sexual harassment	☒	☒	☒
c. How to report sexual assault	☒	☒	☒
d. How to avoid situations that might increase the risk of sexual assault	☒	☒	☒
e. How to obtain medical care following a sexual assault	☒	☒	☒
f. How to obtain counseling following a sexual assault	☒	☒	☒
g. The services that your Academy's legal office can provide to a victim in response to sexual assaults	☒	☒	☒
h. The general responsibilities of law enforcement and criminal investigative agencies in response to sexual assaults	☒	☒	☒
i. The role of the chain of command in handling sexual assaults	☒	☒	☒
j. Where to go if I need additional information on the areas above	☒	☒	☒

ACADEMY CLIMATE

12. To what extent do you agree or disagree with the following statements about how men and women are treated at your Academy? *Mark one answer in each row.*

	Strongly agree	Agree	No opinion	Disagree	Strongly disagree
a. Men receive more favorable treatment overall	☒	☒	☒	☒	☒
b. Women receive more favorable treatment overall	☒	☒	☒	☒	☒
c. Men and women are treated fairly overall	☒	☒	☒	☒	☒

13. Do you agree or disagree with the following statement? Cadet/midshipman dormitory/ barracks areas should be physically separated (e.g., different floors or buildings) by gender.

- ☒ Agree
- ☒ No opinion
- ☒ Disagree

14. At your Academy, to what extent do you think current cadet/midshipman leaders... *Mark one answer in each row.*

	Very large extent	Large extent	Moderate extent	Small extent	Not at all	No basis to judge
a. Demonstrate good examples of sound moral character?	☒	☒	☒	☒	☒	☒
b. Hold others accountable for their conduct?	☒	☒	☒	☒	☒	☒
c. Promote and safeguard the welfare of subordinates?	☒	☒	☒	☒	☒	☒
d. Create a climate in which sexual harassment is not tolerated?	☒	☒	☒	☒	☒	☒
e. Create a climate in which cadets/midshipmen are encouraged to report sexual harassment?	☒	☒	☒	☒	☒	☒

14. Continued

	No basis to judge	Not at all	Small extent	Moderate extent	Large extent	Very large extent
f. Create a climate in which sexual assault is not tolerated?						
g. Create a climate in which cadets/midshipmen are encouraged to report sexual assault?						
h. Ensure those who have reported sexual harassment/ assault are treated with dignity and respect?						

15. At your Academy, to what extent do you think current <u>commissioned officers directly in charge of your unit</u> (e.g., TAC, AOC, Co Officers)... *Mark one answer in each row.*

	No basis to judge	Not at all	Small extent	Moderate extent	Large extent	Very large extent
a. Demonstrate good examples of sound moral character?						
b. Hold others accountable for their conduct?						
c. Promote and safeguard the welfare of subordinates?						
d. Create a climate in which sexual harassment is not tolerated?						
e. Create a climate in which cadets/midshipmen are encouraged to report sexual harassment?						
f. Create a climate in which sexual assault is not tolerated?						
g. Create a climate in which cadets/midshipmen are encouraged to report sexual assault?						
h. Ensure those who have reported sexual harassment/ assault are treated with dignity and respect?						

15. Continued

	No basis to judge	Not at all	Small extent	Moderate extent	Large extent	Very large extent
i. Provide an appropriate level of privacy to those who have experienced sexual assault?						
j. Provide adequate information to cadets/midshipmen about policies, procedures, and consequences of sexual assault?						

16. At your Academy, to what extent do you think the current <u>Academy Senior Leadership</u> (e.g., Superintendent, Commandant, Vice/Deputy Commandant, Dean)... *Mark one answer in each row.*

	No basis to judge	Not at all	Small extent	Moderate extent	Large extent	Very large extent
a. Demonstrate good examples of sound moral character?						
b. Hold cadets/midshipmen accountable for their conduct?						
c. Promote and safeguard the welfare of subordinates?						
d. Treat cadets/midshipmen fairly regardless of gender?						
e. Create a climate in which sexual harassment is not tolerated?						
f. Create a climate in which sexual assault is not tolerated?						

17. At your Academy, to what extent do you think the current <u>academic faculty</u>... *Mark one answer in each row.*

	No basis to judge	Not at all	Small extent	Moderate extent	Large extent	Very large extent
a. Demonstrate good examples of sound moral character?						
b. Hold cadets/midshipmen accountable for their conduct?						
c. Promote and safeguard the welfare of subordinates?						
d. Treat cadets/midshipmen fairly regardless of gender?						
e. Create a climate in which sexual harassment is not tolerated?						
f. Create a climate in which sexual assault is not tolerated?						

18. Based on the behavior you have observed, to what extent are <u>cadets/midshipmen at your Academy</u> willing to... *Mark one answer in each row.*

	No basis to judge	Not at all	Small extent	Moderate extent	Large extent	Very large extent
a. Confront other cadets/ midshipmen who engage in sexual harassment, including inappropriate comments and actions?						
b. Report other cadets/midshipmen who continue to engage in sexual harassment after having been previously confronted?						
c. Report other cadets/midshipmen who commit sexual assault?						

19. To what extent do you think <u>cadets/midshipmen at your Academy</u>... *Mark one answer in each row.*

	No basis to judge	Not at all	Small extent	Moderate extent	Large extent	Very large extent
a. Allow personal loyalties to affect reporting of sexual assault?						
b. Do not report sexual assault out of concern they or others will be punished for infractions, such as fraternization or underage drinking?						
c. Consider fraudulent reporting of sexual assault incidents to be a problem at the Academy?						

20. At your Academy, to what extent... *Mark one answer in each row.*

	Not at all	Small extent	Moderate extent	Large extent	Very large extent
a. Do cadets/midshipmen treat all cadets/midshipmen with respect and dignity, regardless of gender?					
b. Do women get lesser punishment than men who commit the same offenses?					
c. Do people who sexually harass others get away with it?					
d. Do cadets/midshipmen feel comfortable reporting sensitive issues such as discrimination, harassment, or sexual assault to Academy staff?					
e. Do better qualified men get passed over for leadership positions because it would look better for equal opportunity for a woman to have the position?					

21. How would you rate the... ***Mark one answer for each statement.***

	Poor	Fair	Good	Very good	Excellent
a. Command climate in your cadet/midshipman chain of command?	☒	☒	☒	☒	☒

PERSONAL EXPERIENCES

23. In this question you are asked about sex/gender related talk and/or behavior that was unwanted, uninvited, and in which you did not participate willingly.

How often since June 2004 have you been in situations involving persons assigned to your Academy (e.g., cadets/midshipmen and/or other military or civilian personnel working at your Academy) where one or more of these individuals (of either gender)... ***Mark one answer in each row.***

	Very often	Often	Sometimes	Once or twice	Never
a. Repeatedly told sexual stories or jokes that were offensive to you?	☒	☒	☒	☒	☒
b. Referred to people of your gender in insulting or offensive terms?	☒	☒	☒	☒	☒
c. Made unwelcome attempts to draw you into a discussion of sexual matters (e.g., attempted to discuss or comment on your sex life)?	☒	☒	☒	☒	☒
d. Treated you "differently" because of your gender (e.g., mistreated, slighted, or ignored you)?	☒	☒	☒	☒	☒

23. Continued

	Very often	Often	Sometimes	Once or twice	Never
e. Made offensive remarks about your appearance, body, or sexual activities?	☒	☒	☒	☒	☒
f. Made gestures or used body language of a sexual nature that embarrassed or offended you?	☒	☒	☒	☒	☒
g. Made offensive sexist remarks (e.g., suggesting that people of your gender are not suited for the kind of work you do)?	☒	☒	☒	☒	☒
h. Made unwanted attempts to establish a romantic sexual relationship with you despite your efforts to discourage it?	☒	☒	☒	☒	☒
i. Put you down or was condescending to you because of your gender?	☒	☒	☒	☒	☒
j. Continued to ask you for dates, drinks, dinner, etc., even though you said "No"?	☒	☒	☒	☒	☒
k. Made you feel like you were being bribed with some sort of reward or special treatment to engage in sexual behavior?	☒	☒	☒	☒	☒
l. Made you feel threatened with some sort of retaliation for not being sexually cooperative (e.g., by mentioning an upcoming review or evaluation)?	☒	☒	☒	☒	☒
m. Touched you in a way that made you feel uncomfortable?	☒	☒	☒	☒	☒
n. Made unwanted attempts to stroke, fondle, or kiss you?	☒	☒	☒	☒	☒
o. Treated you badly for refusing to have sex?	☒	☒	☒	☒	☒
p. Implied better assignments or better treatment if you were sexually cooperative?	☒	☒	☒	☒	☒
q. Attempted to have sex with you without your consent or against your will, but was not successful?	☒	☒	☒	☒	☒
r. Had sex with you without your consent or against your will?	☒	☒	☒	☒	☒
s. Other unwanted gender-related behavior? (please specify)	☒	☒	☒	☒	☒

Please print.

24. How many of the behaviors listed in the previous question that YOU MARKED AS HAPPENING TO YOU do you consider to have been sexual harassment?

- ☒ None were sexual harassment
- ☒ Some were sexual harassment
- ☒ Most were sexual harassment
- ☒ All were sexual harassment
- ☒ Does not apply, I marked "Never" to every item

25. Since June 2004, has someone done any of the following to you without your consent and against your will?

- **Touched, stroked, or fondled your private**
- **parts?**
  Physically attempted to have sexual intercourse with you, but was not successful?
- **Physically attempted to have oral or anal sex with you, but was not successful?**
- **Had sexual intercourse with you?**
- **Had oral sex with you?**
- **Had anal sex with you?**

- ☒ Yes
- ☒ No ⇨ GO TO QUESTION 49

ONE SITUATION WITH THE GREATEST EFFECT

26. If you answered "Yes" to the previous question, think about the situation(s) you experienced since June 2004. Pick one situation to tell us about in this section. That situation should be the event that had the greatest effect on you. What did the person(s) do during this situation? ***Mark one answer for each behavior.***

	Did this	Did not do this
a. Touched, stroked, or fondled your private parts.	☒	☒
b. Physically attempted to have sexual intercourse with you, but was not successful	☒	☒
c. Physically attempted to have oral or anal sex with you, but was not successful	☒	☒
d. Had sexual intercourse with you	☒	☒
e. Had oral or anal sex with you	☒	☒

27. In which semester did this occur?

- ☒ Summer
- ☒ Fall
- ☒ Spring

28. Where did this incident take place?

- ☒ On installation, in dorm/barracks
- ☒ On installation, not in dorm/barracks
- ☒ Off installation, at an Academy-sponsored event
- ☒ Off installation, and not at an Academy-sponsored event

29. Did the incident involve multiple offenders?

- ☒ Yes
- ☒ No
- ☒ Don't know

30. How well did you know the offender(s) at the time of the incident? *If there were multiple offenders, choose the answer that best describes the person you know best.*

- ☒ Very well (current/former significant other, friend, etc.)
- ☒ Somewhat well (casual acquaintance)
- ☒ Not at all (stranger–someone you had never seen before)

31. What was the gender of the person(s) involved?

- ☒ Male
- ☒ Female

32. Who was the offender(s)? *Mark "Yes" or "No" for each item.*

	Yes	No
a. Cadet/midshipman who was senior to me	☒	☒
b. Cadet/midshipman who was in the same class as me or below	☒	☒
c. Military faculty or staff member	☒	☒
d. Civilian faculty or staff member	☒	☒
e. Military person not assigned to your Academy	☒	☒
f. Civilian person not assigned to your Academy	☒	☒
g. Unidentified person	☒	☒

33. Did the offender(s)? *Mark "Yes" or "No" for each item.*

	Yes	No
a. Use force to make you consent?	☒	☒
b. Threaten to harm you if you did not consent?	☒	☒

34. Did the incident occur... *Mark "Yes" or "No" for each item.*

	Yes	No
a. When you were so intoxicated that you were unable to consent?	☒	☒
b. When the offender(s) was intoxicated?	☒	☒
c. After the offender(s) used drugs to knock you out (e.g., date rape drugs, sedatives, etc.)?	☒	☒

35. Did you discuss/report this situation to any authorities, individuals or organizations?

- ☒ Yes, and it made things better
- ☒ Yes, but it made no difference
- ☒ Yes, and it made things worse
- ☒ Yes, but it is too soon to tell if it will make things better or worse
- ☒ No, I did not report it ⇨ GO TO QUESTION 48

36. To which authorities, individuals or organizations was this incident reported? *Mark "Yes" or No" for each item.*

	Yes	No	Does not apply
a. Officer/NCO chain of command member (AOC, MTL, Co Officer, SEL)	☒	☒	
b. Faculty member, coach, sponsor, or Academy staff not in chain of command	☒	☒	
c. Academy hotline/helpline	☒	☒	
d. Civilian assault/crisis centers/ hotline/helpline	☒	☒	
e. Academy Response Team (ART) [NA for USMA and USNA]	☒	☒	☒
f. Cadet/midshipman chain of command member	☒	☒	
g. Peer resource (e.g., SAVI Guide, CASIE Rep) [NA for USMA]	☒	☒	☒
h. Academy Counseling or Development Center	☒	☒	
i. Off-installation counseling center	☒	☒	
j. SAVI advocate/coordinator [NA for USMA and USAFA]	☒	☒	☒
k. Equal Opportunity (EO) office	☒	☒	☒
l. Installation medical personnel	☒	☒	
m. Criminal investigation organizations (e.g., OSI/CID/NCIS)	☒	☒	

36. Continued

	Yes	No	Does not apply
n. Security forces, military police, USNA police	☒	☒	
o. Civilian lawyers	☒	☒	
p. Academy Inspector General's Office [NA for USNA]	☒	☒	☒
q. Academy chaplain/clergy	☒	☒	
r. Civilian law enforcement agency	☒	☒	
s. Service or DoD Inspector General's office or hotline	☒	☒	
t. Military lawyers (e.g., SJA)	☒	☒	
u. Parent, family member, friend, or boyfriend/girlfriend	☒	☒	
v. Other (please specify)	☒	☒	

Please print.

37. Did anyone in a position of authority retaliate against you for reporting this incident (such as unwarranted punishment, demotion, or withholding a favorable duty position)?

- ☒ Yes
- ☒ No ⇨ GO TO QUESTION 39
- ☒ Don't know ⇨ GO TO QUESTION 39

38. Please indicate if the following people retaliated against you. *Mark "Yes" or "No" for each item.*

	Yes	No
a. Cadet/midshipman in my chain of command	☒	☒
b. Upperclassmen not in my chain of command	☒	☒
c. Commissioned officer in my chain of command	☒	☒
d. Other Academy staff or faculty.	☒	☒
e. Service officials outside your Academy	☒	☒
f. Other person(s)	☒	☒

39. Did you experience any other repercussions for reporting the incident?

- ☒ Yes
- ☒ No ⇨ GO TO QUESTION 41

40. Please indicate if you experienced any of the following other repercussions for reporting the incident. *Mark "Yes" or "No" for each item.*

	Yes	No
a. Ostracism, harassment, or ridicule from other cadets/midshipmen not in my chain of command	☒	☒
b. Ostracism, harassment, or ridicule from cadets/midshipmen in my chain of command	☒	☒
c. Ostracism, harassment, or ridicule from Academy staff or faculty members	☒	☒
d. Other significant repercussions (please specify)	☒	☒

Please print.

41. Did a military criminal investigative organization (e.g., OSI/CID/NCIS) or a civilian law enforcement agency conduct a criminal investigation?

- ☒ Yes ⇨ GO TO QUESTION 43
- ☒ No
- ☒ Don't know

42. Why wasn't there a criminal investigation conducted?

- ☒ The incident was not reported to law enforcement officials
- ☒ I declined to cooperate with an investigation
- ☒ I don't know

43. Were you informed of the final disposition of this matter?

- ☒ Yes
- ☒ No, I was not informed
- ☒ Not applicable, the offender was never identified
- ☒ Not applicable, the situation has not been resolved (e.g., on-going investigation or legal proceedings)
- ☒ Not applicable, the situation was not reported to a criminal investigative organization

44. Do you feel that your chances of having a successful academic career at the Academy will be affected by making this report?

- ☒ Yes, my chances will be improved
- ☒ Yes, my chances will be worse
- ☒ No, my academic career will not be affected

45. Do you feel that your chances of having a successful military career will be affected by making this report?

- ☒ Yes, my chances will be improved
- ☒ Yes, my chances will be worse
- ☒ No, my career will not be affected

46. How satisfied were you with how the following authorities, individuals or organizations handled the incident?

	Does not apply/Did not use this resource	Very dissatisfied	Dissatisfied	Neither satisfied nor dissatisfied	Satisfied	Very satisfied
a. Investigative agencies (e.g., OSI/CID/NCIS)	☒	☒	☒	☒	☒	☒
b. Military lawyers handling your case (e.g., SJA)	☒	☒	☒	☒	☒	☒
c. Victim witness assistance	☒	☒	☒	☒	☒	☒
d. SAVI advocate/coordinator or Academy Response Team (ART) [NA for USMA]	☒	☒	☒	☒	☒	☒
e. Academy Counseling or Development Center	☒	☒	☒	☒	☒	☒
f. Peer resource (CASIE Rep/ SAVI Guide) [NA for USMA]	☒	☒	☒	☒	☒	☒
g. Chain of command	☒	☒	☒	☒	☒	☒

47. If you were not satisfied with any of the authorities, individuals or organizations listed in the previous question, please indicate why. *Mark "Yes" or "No" for each item.*

	Yes	No
a. Nothing was done about the complaint	☒	☒
b. My privacy was not protected	☒	☒
c. They did not prevent harassment by offender or other cadets/midshipmen	☒	☒
d. My complaint was discounted or not taken seriously	☒	☒

47. Continued

	Yes	No
e. They were not concerned for my welfare	☒	☒
f. I was not informed of my rights	☒	☒
g. I felt pressured to report the incident	☒	☒
h. I felt pressured to press charges	☒	☒
i. I was encouraged to drop my complaint	☒	☒
j. The investigation process took/is taking too long	☒	☒
k. Other (please specify)	☒	☒

Please print.

If you reported the incident to military or Academy authorities, SKIP THE NEXT SECTION AND GO TO QUESTION 49.

REASONS FOR NOT REPORTING

48. You indicated that you did not report the incident to military or Academy authorities. What were the reasons that were the most important to you when you decided not to report? *Mark "Yes" or "No" for each item.*

	Yes	No
a. It was not important enough to report	☒	☒
b. I handled it myself	☒	☒
c. I thought I would be labeled a troublemaker	☒	☒
d. I thought nothing would be done	☒	☒
e. Threatened with some form of retaliation	☒	☒
f. Not threatened with retaliation, but feared some form of retaliation	☒	☒
g. Feared ostracism, harassment, or ridicule by peers	☒	☒
h. Feared loss of friends	☒	☒
i. Feared I or others would be punished for infractions/violations (such as underage drinking)	☒	☒
j. I did not want people gossiping about the assault	☒	☒
k. I did not want my parents/family to find out	☒	☒
l. Pressured by someone in position of authority	☒	☒

48. Continued

	No	Yes
m. I did not want my boyfriend/girlfriend to find out	☒	☒
n. Shame/embarassment	☒	☒
o. Feared other repercussions	☒	☒
p. I thought people would not believe me	☒	☒
q. Not aware of reporting procedures	☒	☒
r. I thought I could deal with it myself	☒	☒
s. I wanted to fit in	☒	☒
t. I thought I would be blamed for the assault	☒	☒
u. Other (please specify)	☒	☒

Please print.

HOW ARE WE DOING?

49. In your opinion, has sexual harassment become more or less of a problem at your Academy since you became a cadet/midshipman?

- ☒ Less of a problem
- ☒ About the same
- ☒ More of a problem

50. In your opinion, has sexual assault become more or less of a problem at your Academy since you became a cadet/midshipman?

- ☒ Less of a problem
- ☒ About the same
- ☒ More of a problem

51. In your opinion, how often does sexual harassment occur at the Service Academies compared to civilian colleges/universities?

- ☒ Much more often at the Academies
- ☒ More often at the Academies
- ☒ About the same
- ☒ Less often at the Academies
- ☒ Much less often at the Academies
- ☒ Don't know, I do not know the climate at civilian colleges/universities

52. In your opinion, how often does sexual assault occur at the Service Academies compared to civilian colleges/universities?

- ☒ Much more often at the Academies
- ☒ More often at the Academies
- ☒ About the same
- ☒ Less often at the Academies
- ☒ Much less often at the Academies
- ☒ Don't know, I do not know the climate at civilian colleges/universities

53. In your opinion, how do the moral and ethical standards at the Service Academies compare to standards at civilian colleges/universities?

- ☒ Higher standards at the Academies
- ☒ Higher standards at civilian colleges/universities
- ☒ Same/no difference
- ☒ Don't know, I do not know anything about the moral and ethical standards at civilian colleges/universities

TAKING THE SURVEY

54. If you have comments or concerns that you were not able to express in answering this survey, please enter them in the space provided. Your comments will be viewed and considered as policy deliberations take place. Any comments you make on this questionnaire will be kept confidential, and no follow-up action will be taken in response to any specifics reported. Your feedback is useful and appreciated.

Appendix B
Letters and emails

Letter to Tac and Tac NCOs

March 22, 2005

Ladies and Gentlemen,

Approximately 1700 cadets (100% of women and a 30% random sample of men) will be required to participate in a mandatory Sexual Assault Survey administration session.

The Department of Defense Inspector General (DoD IG) will conduct this annual Sexual Assault Survey at all three Academies in March/April 2005. This is a high visibility action and their report will go to Congress.

The surveys will be administered at Thayer Hall in separate sessions for men and women between 11-15 April - with make-up sessions between 18-19 April.

Today, participating cadets will receive an assigned survey administration time and room location corresponding with one of his/her free hours.

The DoD IG is requiring full participation by men and women. Given the large number of participants, and limited time and room availability, rescheduling is strongly discouraged. In order to limit unnecessary reschedulings, cadets will be required to first notify their TAC or TAC NCO regarding a scheduling conflict. TACs are asked to encourage cadets to keep their assigned appointment. Please solicit the help of your Company Respect Officer to assist with compliance.

If an assigned appointment does require rescheduling, cadets must then contact my office (OPA-IRAB) by replying to their e-mail notification prior to 25 March.

Rosters and testing schedules of participating cadets are attached. When opening the file click on the tab associated with your company. Could you please review this list and reply if there are any cadets included who you know will not be able to participate?

Thank you very much for your support,

Very respectfully,
LTC Mike Johnson
Chief Institutional Research and Analysis Branch

March 23, 2005

CADET CHRISTOPHER VESCE,

You have been selected as one of approximately 1700 cadets (100% of women and a 30% random sample of men) who will be required to participate in a mandatory Sexual Assault Survey administration session.

The Department of Defense Inspector General (DoD IG) will conduct this annual Sexual Assault Survey at all three Academies in March/April 2005. This is a high visibility action and their report will go to Congress.

The surveys will be administered at Thayer Hall in separate sessions for men and women between 11-15 April.

You are required to report to room TH144, Thayer Hall at 1455 until 1550 on 4/11/2005 April. This hour corresponds with one of your free hours. This is your place of duty. Please deconflict all AI sessions, miscellaneous appointments, etc.

The DoD IG is requiring full participation by men and women. Given the large number of participants, and limited time and room availability, rescheduling is ***strongly*** discouraged. If you do require rescheduling, you must first contact your company TAC or TAC NCO, and, then my office (OPA-IRAB) by replying to this e-mail notification prior to 25 March.

Thank you very much for your support,

Very respectfully,
LTC Mike Johnson
Chief, Institutional Research and Analysis Branch

Letter to Tac and Tac NCOs

REMINDER

April 8, 2005

Cadet ASHIAN IZADI,

You have been selected as one of approximately 1700 cadets (100% of women and a 30% random sample of men) who will be required to participate in a mandatory Sexual Assault Survey administration session.

The Department of Defense Inspector General (DoD IG) will conduct their annual Sexual Assault Survey at all three Academies in March/April 2005. This is a high visibility action and their report will go to Congress.

The surveys will be administered at Thayer Hall in separate sessions for men and women between 11-15 April.

You are required to report to room TH341, Thayer Hall at 0945 until 1040 on 11 April. This hour corresponds with one of your free hours. This is your place of duty. Please deconflict all AI sessions, miscellaneous appointments, etc.

The deadline for any required rescheduling has passed. Additional rescheduling is *strongly* discouraged. If you do require emergency rescheduling, you must first contact your company TAC or TAC NCO, and, then my office (OPA-IRAB) by replying to this e-mail notification.

Thank you very much for your support,

Very respectfully,
LTC Mike Johnson
Chief, Institutional Research and Analysis Branch

Letter to Tac and Tac NCOs

From: [Superintendent of the United States Naval Academy]
Sent: Thursday, March 31, 2005 8:45 AM
To: [ALL MIDSHIPMEN]
Cc: [ACADEMY LEADERS]
Subject: Upcoming DoD Sexual Assault and Leadership Survey

Brigade,

Next week the 2nd Annual DoD Sexual Assault and Leadership Survey will be administered here at the Naval Academy. Many of you will be asked to participate. It was last taken by a large number of you in April 2004.

Like last year, the purpose of this survey is to provide information to Department of Defense, Department of Navy and Naval Academy leadership on your values, on the Academy's climate, and on the occurrence of incidents of sexual harassment or assault. It is required by Congressional law and will be administered by the Defense Manpower Data Center.

This survey is one of our principle means of determining what is actually occurring at the Naval Academy. Your inputs, particularly when asked about your own personal experience, are vital to our ability to accurately describe the climate/culture of the Naval Academy, and thus, identify weaknesses that we need to focus on improving. For me to do my job properly as Superintendent I need valid data. Thus I am asking you to devote enough time and attention to this survey so the data reflects reality.

Please note also that while last year's survey asked about your entire experience as midshipmen, this year's survey will ask only about the timeframe from June 2004 through present. It will be administered on paper, vice electronically, this year. You will be required to muster to take the survey. However, actually answering questions is entirely voluntary.

Again, thank you in advance for your time and effort in completing the 2005 DoD Sexual Assault and Leadership Survey. I can assure you that your investment of personal time will indeed make a difference in the future of our Naval Academy.

R/

Supe

Letter to Tac and Tac NCOs

April 4, 2005

Ladies and Gentlemen,

Approximately 32 cadets will be required to participate in a mandatory Sexual Assault Survey Focus Group session. The focus groups will add insight to the results obtained from the Sexual Assault Survey that is currently being administered.

In addition to the focus groups, the Defense Manpower Data Center (DMDC) will conduct their annual Sexual Assault Survey at all three Academies in March/April 2005. This is a high visibility action and their report will go to Congress.

The focus groups will be administered at Thayer Hall 14 April.

Today, participating cadets will receive an assigned focus group time and room location corresponding with one of their free hours.

The DoD IG is requiring full participation. Rescheduling is strongly discouraged. In order to limit unnecessary rescheduling, cadets will be required to first notify their TAC or TAC NCO regarding a scheduling conflict. TACs are asked to encourage cadets to keep their assigned appointment. Please solicit the help of your Company Respect Officer to assist with compliance.

If an assigned appointment does require rescheduling, cadets must then contact my office (OPA-IRAB) by replying to their e-mail notification prior to 25 March.

If there are cadets from your company participating you will find their names included on the attached rosters. An updated roster will be sent after rescheduling is finalized. When opening the file click on the tab associated with your company. Could you please review this list and reply if there are any cadets included who you know will not be able to participate?

Thank you very much for your support,

Very respectfully,
LTC Mike Johnson
Chief Institutional Research and Analysis Branch

HOW ARE WE DOING?

SB049

49. In your opinion, has sexual harassment become more or less of a problem at your Academy since you became a cadet/midshipman?

1 ☐ Less of a problem
2 ☐ About the same
3 ☐ More of a problem

SB050

50. In your opinion, has sexual assault become more or less of a problem at your Academy since you became a cadet/midshipman?

1 ☐ Less of a problem
2 ☐ About the same
3 ☐ More of a problem

SB051

51. In your opinion, how often does sexual harassment occur at the Service Academies compared to civilian colleges/universities?

1 ☐ Much more often at the Academies
2 ☐ More often at the Academies
3 ☐ About the same
4 ☐ Less often at the Academies
5 ☐ Much less often at the Academies
6 ☐ Don't know, I do not know the climate at civilian colleges/universities

SB052

52. In your opinion, how often does sexual assault occur at the Service Academies compared to civilian colleges/universities?

1 ☐ Much more often at the Academies
2 ☐ More often at the Academies
3 ☐ About the same
4 ☐ Less often at the Academies
5 ☐ Much less often at the Academies
6 ☐ Don't know, I do not know the climate at civilian colleges/universities

SB053

53. In your opinion, how do the moral and ethical standards at the Service Academies compare to standards at civilian colleges/universities?

1 ☐ Higher standards at the Academies
2 ☐ Higher standards at civilian colleges/universities
3 ☐ Same/no difference
4 ☐ Don't know, I do not know anything about the moral and ethical standards at civilian colleges/universities

TAKING THE SURVEY

COMMENT

54. If you have comments or concerns that you were not able to express in answering this survey, please enter them in the space provided. Your comments will be viewed and considered as policy deliberations take place. Any comments you make on this questionnaire will be kept confidential, and no follow-up action will be taken in response to any specifics reported. Your feedback is useful and appreciated.

Appendix D
Coding Scheme

APPENDIX D: Coding Scheme for the *2005 Service Academies Sexual Assault Survey*

The guiding premise of coding this and other DMDC surveys is that the analysts creating the dataset will not be the only ones analyzing the data. DMDC rarely collects data simply for immediate use or to answer one question. Different people, both at DMDC and other organizations (government, academic, and private-sector), analyze DMDC datasets repeatedly over time. Every care is taken in organizing and documenting DMDC surveys so secondary analysts can be reasonably certain they understand both how the data are coded and the limitations of the data. This appendix describes (a) variable naming conventions, (b) how data are captured from the survey instrument, and (c) the edit process to create survey response variables for the analysis file.

Variable Naming

In responding to a customer's request for information, DMDC often uses multiple data sources. Information on a particular topic could be obtained from different surveys or from a survey that has been repeated over a number of years. For example, a customer might be interested in organizational commitment items included in a survey of active duty members in 1999 and in an exit survey in 2000. Conventions discussed below are being used as a means for facilitating such analyses.

Survey-derived Variables

Identical demographic items are used across many DMDC surveys. Each time these items are used, common variable names and values are used. The variable names for this group of demographic items start with "SR" (mnemonic for self reported). The following items in this survey fall into this category: SRSEX (for gender), SRACAD (for Service Academy), and SRCLASS (for Class year). COMMENT (for a flag indicating if a comment has been entered) and SRDATE (for the date the survey was completed) are other standard variables across DMDC surveys.

The basic naming conventions are implemented as follows for 2005 Service Academies Sexual Assault Survey:

- Basic variable names start with "SB" for items appearing in SASA2005. The "S" stands for Service and the "B" means that this is the second time this survey has been fielded (it was first fielded by the DoD IG in 2004)

- The third, fourth, and fifth characters after the SB are item numbers in the survey from 001 through 053.

- Letters following the numbers for multi-part items usually represent the sub-item. The exceptions skip pattern flags (ending in "SK") and specify flags (ending in a "SP"), are explained later in the section titled, Standard Flag Variables.

Items that are collected for each implementation of a survey (core items) are given standardized names to ease data analysis. For SASA 2005, item 25 fell into this category. The item "has someone done any of the following to you without your consent and against your will?" has the variable name NOCNSNT.

Non-survey-derived Variables

Variable names for non-survey-derived variables tend to use acronyms that aid in remembering the meanings of the variables. Two important conventions were used in naming variables.

This selection describes the DMDC standard naming of variables that are derived from record data. A variable name from DMDC record files was used only if the data, values, and value labels were identical to those from an official DMDC personnel data file. When data were added to an analysis file unchanged from record data, the same variable name, values, and value labels were used.

Each academy provided record data that were used to draw the sample of eligible men and a census of eligible women. These data included name, academy, class and gender. These data are not available for analysis. For the protection of respondent, the SASA2005 was an anonymous survey. There is no way to link record variables to the individual respondents. In order to link record data to respondent data two steps need to happen: 1) Surveys have to be encoded with unique identifiers and 2) Surveys have to be assigning to each sample member and recoded in a database. Neither was implemented for this project for the protection of anonymity. SASA2005 does not have record data merged with the survey response data.

Through administration procedures, we created variables that provided us the imputation function of record variables. The surveys were batched by gender, Academy, session time and session room and then shipped to be scanned. The surveys were fielded on different days at the three Academies. Hence we were able to create CACAD and CSEX from the batch record sheet for each student who was briefed.

Beginning a variable name with "X" indicates it is a special crossing (marginal) variable for key analyses. "X variables" typically involve using record data to impute values for missing data in survey items. X variables may also require collapsing or recoding to missing in order to preserve confidentiality of respondents. For this project if the self reported information for gender or Academy (SRSEX, SRACAD) was missing then we used the administration values (CSEX, CACAD) to impute gender and Academy for the creation of reports (XSEX, XACAD). (See Appendix I for the programming that was used to compute X variables.)

Value Coding and Formats

Datasets were prepared as SAS[1] system files. An OS or flat file version of the public release file was then prepared from the SAS system file. This section describes how values were treated in creating the SAS system files and notes any differences in the flat file.

In the SAS system files, variables were declared as numeric unless they contained true alphabetic characters. Although numeric variables can take more storage space, many statistical and logical operations can be done only with variables that are declared as numeric. Values for alphabetic variables were input with $CHARww. formats to preserve leading, embedded, and trailing blanks.

Raw-Data Encoding Process

Paper surveys are scanned using Intelligent Character Recognition (ICR) technology. Survey booklets were batched for Image scanning and assigned a batch number. The booklets were cut to separate all the pages to prepare for scanning. As the surveys were scanned, the batch number and a serial number (unique to each survey) were printed on each page. The surveys were machine edited for light marks, multiple marks, and alignment. Damaged forms were repaired and scanned with non-damaged forms, if possible. If it was not possible to scan the documents, they were batched separately and key entered. Prior to providing each dataset to DMDC, the operations contractor copied the indexed file to their internal network. The data are then converted to a sequential format, and the validate program reads and loads the data to the dataset. This process cleans the data to the standards set in the coding scheme.

The "other specify" and open-ended comments are collected in a comment file and linked to the data by an identifier given to each survey as it is scanned. All text entries are cleaned and edited to remove identifying information and expletives.

Data cleaning can be thought of as occurring in four coding steps. In practice, these steps may not be strictly linear, nor neatly match the processing steps discussed above. However, they are a convenient framework to understand the meaning of the codes.

1. Each response is coded with one of two types of standard codes: valid response option value (see Coding Annotation of the survey form in Appendix C) or no response (-9).
2. Specify flag variables are created, and codes are assigned to indicate if respondents typed in responses correctly where text boxes were used.
3. Skip flag variables are created, and codes are assigned to indicate if respondents completed the skip pattern correctly. Special codes for valid skips are assigned to variables within skip patterns using a "forward coding" process.
4. Text code variables are created, and codes are assigned based on the content coding of the text entries.

[1] SAS is a trademark of the SAS Institute, Inc.

In the coding sequence, coding in the third and later steps builds on prior steps and usually involves values in multiple items to resolve edits.

The next sections discuss the assignment of missing value codes, the special treatment of data variables, and the editing of skip patterns during steps 3 and 4.

Missing Data Codes

The instructions used to assign missing data codes and other special codes are shown in three tables. In these tables, the value labels associated with each assigned code are shown in italicized text. These are the SAS format labels used in the SAS dataset.

- Table D-1 contains basic SAS and flat file missing data codes.
- Table D-2 contains SAS and flat file missing data codes for dates.
- Table D-3 provides detailed coding notes on items involving skip patterns, text boxes or other non-obvious coding.

The codes presented in Table D-1 are general missing data codes that have been adopted in recent years for use on DMDC surveys. (Standards for date variables are in Table D-2.) Both tables have separate columns for values used for SAS system files and flat files. The biggest difference between the flat files and SAS system files is in the treatment of missing values. The flat file codes differ from the SAS codes because SAS implements special missing codes and formats that may not be compatible with other statistical analysis software such as SPSS[2].

[2] SPSS is a trademark of SPSS Inc.

Table D-1:
Basic SAS® and Flat Missing Data Codes

SAS® File		Flat File		
Numeric	Alpha	Numeric	Alpha	Description
.	.	-9	.	*No response or missing skip*
.O	.O	-7	.O	*Out-of-range*
.A	.A	-8	.O	*Multiple response error*
.N	.N	-6	.N	*Not applicable* or *Valid skip*
.F	.F	-5	.F	*Variable not on survey form*. This value is reserved for multiple-form surveys.
.I	.I	-4	.I	*Incomplete grid error*
.G	.G	-3	.G	*No match on official records*. Only used for master file, sampling, and weighting variables for surveys that cannot be matched back to the sample file. Typically used in files of duplicate returns; these returns are not stored in the main or public-use data files.
.B	.B	-1	.B	*No survey returned*. Filler values for survey variables when either a blank survey is returned or no survey is returned. Control system variables retain assigned values.
99	99	99	99	*Does not apply - I marked No to Question 25*

Table D-2:
SAS® and Flat File Missing Data Codes for Dates

SAS® File		Flat File		
Re-coded value	Value read from input	YYYYMMDD	MMMYYYY	Description
.	-54908	18090901	SEP1809	*No response (invalid skip)*
.O	-55701	18070701	JUL1807	*Out-of-range error*
.N	-56096	18060601	JUN1806	*Not applicable (valid skip)*
.I	-56887	18040401	APR1804	*Incomplete grid error*
.B	-58073	18010101	JAN1801	*Blank/no survey*. Filler value for survey variables when either a blank survey is returned or no survey is returned. Control system variables retain assigned values.

Note. This conversion has already been done in DMDC SAS® files.

SAS can represent up to 27 missing data values for numeric variables as either a period or a period-letter combination. While SAS can read alpha characters representing missing data in a raw data field declared to be numeric, other programs such as SPSS do not accept these characters in numeric fields. Missing numeric data are represented in the flat files by negative numbers that can be declared as missing values. For example, a multiple response error in flat files is coded as a "-8", which can be declared as a missing value when the data are input in SPSS—in the SAS file, the value ".A" is used to represent a multiple response error.

Data requirements of SUDAAN[3] were also considered in coding. Primarily this means avoiding in coding the use of a zero, which has a special use for certain procedures in SUDAAN, for a variable that will be used as an independent variable.

Many types of missing data are common to surveys and are self-explanatory. In general, missing data are coded as "-9" (SAS: .) when respondents skip the item invalidly. Incomplete or in inappropriate responses in text boxes that could not be resolved to numeric are coded as "-4" (SAS: .I). Out-of-range responses in grids (e.g., number of days or weeks in a year larger than 365 or 52, respectively) are coded as "-7" (SAS: .O).

For a single item that contains a response alternative of "Not applicable," or multiple items that can be affected by a skip pattern, or when item(s) have multiple ways to be not applicable, a missing data code of "-6" (SAS: .N) is typically used.

Multiple survey forms or modes (e.g., paper and web) are sometimes used in a single effort, and the data from all the related forms may be combined into a single dataset for analysis.

[3] SUDAAN is a trademark of the Research Triangle Institute.

Questions may appear in one form or mode but not in another. In a combined dataset, a code of "-5" (SAS: .F) indicates missing data for variables not on the form completed by a respondent.

Records are included in the files for sampled members regardless of whether or not they returned a survey. If a member did not return a survey or returned a blank survey, every survey variable is assigned a value of "-1" (SAS: .B).

Standard Flag Variables

This survey employs two standard flag variables: specify flags and skip flags. Specify and skip flags are created during the second and third edit steps.

Skip pattern flags indicate whether one or more questions were or were not to be asked of respondents. For example, if respondents to this survey indicate on Question 25 (NOCNSNT) that they did not experience sexual assault since June 2005, then respondents were not to answer Question 26. NOCNSNTSK is a flag variable indicating if Question 6 (SB026A) was answered consistently with the skip direction. Skip flags are useful for evaluating the effectiveness of the skip pattern and for screening out ambiguous response patterns during analysis.

Specify flags are used to verify whether additional information was or was not to be gathered on a particular question. For example, SB022SPSK is a flag variable indicating when respondents had another authority, individual or organization that they would be willing to report an experience of sexual assault. The specify flag indicates that respondents were eligible to fill in the specify box, on Question 22, item t. Specify flags are useful for evaluating the completeness of the question option categories.

Special Codes for Skip Patterns

Coding steps 3 and 4 involve editing data to resolve discrepancies in skip patterns. Skip flags are created in step 3. Table D-1 introduced the general outline of the skip flags, but the specific flags for each skip pattern are specified in Table D-3.[4] After the creation of all the skip flags in step 3, variables within the skip patterns are forward coded in step 4 to make them consistent with the variables that start the skip patterns. To preserve all data, the variables within skip patterns are first copied to a set of confidential variables. The naming convention for these "raw" variables is to end the name with "U" for Unedited. Table D-3 specifies how to assign the special values, to variables within the skip patterns. While Table D-3 is organized to show all the edits for a skip pattern, all step 3 edits are made prior to making any step 4 edits. The remainder of this section describes the logic behind coding of skip patterns.

While an analyst can ignore discrepancies between a respondent's answer on an item containing a conditional direction to skip items and answers to those items, it is generally better to resolve the discrepancies. Two ways of resolving the discrepancies can be termed backward and forward coding. Backward coding involves correcting the discrepancy by editing back from the skip pattern items to make the initial question conform. Forward coding involves correcting the discrepancy by editing forward from the initial question to make the skip pattern items

[4] Table D-3 also provides special coding notes for other non-obvious codings.

conform. Data for this survey are forward coded with data on the starting question accepted as marked and data for the items within the skip pattern edited to be consistent with the starting question.

If a starting item is marked in such a way that the respondent should skip, items within the skip pattern have the not applicable value (.N) assigned regardless of what the respondent marked on the items within the skip pattern. These values differentiate items with data missing because the item should have been skipped from items where data are missing because the respondent should have answered them but did not.

Table D-3:
Special Coding Notes

1. **SB004A, SB004B, SB004C, SB004D, SB004E, SB004F, SB004G, SB004H, SB004I, SB004J, SB004K, SB004L, SB004M, SB004N, SB004O, SB004P, SB004Q, and SB004R. The following explains how the items in Question 4 were edited to create the value Not selected**

SB004A, SB004B, SB004C, SB004D, SB004E, SB004F, SB004G, SB004H, SB004I, SB004J, SB004K, SB004L, SB004M, SB004N, SB004O, SB004P, SB004Q, and SB004R were edited from the form that they appeared in the survey instrument. If the respondent did not select an item as a first, second or third, choice then their response is set to 60 (Not selected).

Here is how they are edited:

```
array q4r  SB004A SB004B SB004C SB004D SB004E SB004F SB004G SB004H
SB004I SB004J SB004K SB004L SB004M SB004N SB004O SB004P SB004Q SB004R
;
do over q4r;
    if q4r not in (1,2,3,.A) then q4r = 60;
end;
```

2. **SB008, SB008U. The following explains how SB008 was cleaned based on the value of SB007 – the codebook page for the variable should contain this information:**

SB008U = SB008, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

```
if SB007 = 1 then SB008 = 60;
if SB007 = 2 and SB008 = 60 then SB008 = .;
if SB007 = .  then SB008 = . ;
```

3. **SB010, SB010U. The following explains how SB010 was cleaned based on the value of SB009 – the codebook page for the variable should contain this information:**

SB009U = SB009, but is unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

```
If SB0009 = 1 then SB010 = 60;
If SB009 = 2 and SB010 = 60 then SB010 = . ;
If SB009 = .  then SB010 = . ;
```

4. **SB022SPSK, SB022SPU. The following explains how to create the flag variable – the codebook page should contain this information:**

SB022SPSK is an indicator of whether SB022SP were or were not to be asked of a respondent and its initial value is 1 (Not asked). If SB022T = 2 then SB022SPSK = 2 (Asked).

The following explains how the flag variable is used in editing – the codebook page for the edited variable should contain this information:

SB022SPU = SB022SP, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

```
If SB022SPSK = 1 then do;
      SB022SP = '.N';
end;

.N = (Not applicable)
```

5. **SB022F, SB022FU. The following explains how SB022F was cleaned based on the value of XACAD – the codebook page for the variable should contain this information:**

SB022FU = SB022F, but is unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

```
If XACAD = 1 then SB022F = .N;
else if XACAD in (2, 3) and SB022F = 60 then SB022F = . ;
```

6. **SB022L, SB022LU. The following explains how SB022L was cleaned based on the value of XACAD – the codebook page for the variable should contain this information:**

SB022LU = SB022L, but is unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

```
If XACAD = 2 then SB022L = .N;
Else if XACAD in (1, 3) and SB022L = 60 then SB022L = . ;
```

7. **SB022N, SB022NU. The following explains how SB022N was cleaned based on the value of XACAD – the codebook page for the variable should contain this information:**

SB022NU = SB022N. but is unedited for forward coding of non-applicable or missing response values:

Here is how they are edited:

If XACAD in (1, 2) then SB022N = .N;
else if XACAD = 3 and SB022N = 60 then SB022N = .;

8. **SB022O, SB022OU. The following explains how SB022O was cleaned based on the value of XACAD – The codebook page for the variable should contain this information:**

SB022OU = SB022O. but is unedited for forward coding of non-applicable or missing response values:

Here is how they are edited:

if XACAD in (1, 3) then SB022O = .N;
else if XACAD = 2 and SB022O = 60 then SB022O = . ;

9. **SB023SPSK, SB023SPU. The following explains how to create the flag variable – the codebook page should contain this information:**

SB023SPSK is an indicator of whether SB023SP was or was not to be asked of a respondent and its initial value is 1 (Not asked). If (((SB023S = 2 OR SB023S = 3) OR SB023S = 4) OR SB023S = 5) then SB023SPSK = 2 (Asked).

The following explains how the flag variable is used in editing – the codebook page for the edited variable should contain this information:

SB023SPU = SB023SP, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

```
If SB023SPSK = 1 then do;
      SB023SP = '.N';
end;
```

.N = (Not applicable)

10. **SB024, SB024U. The following explains how Question 24 was edited.**

SB024U= SB024, but is unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

array ques23 SB023A SB023B SB023C SB023D SB023E SB023F SB023G SB023H SB023I SB023J SB023K SB023L SB023M SB023N SB023O SB023P SB023Q SB023R SB023S ;

```
q23 cnt = 0;:
do over ques23;
   if ques23 not in (2,3,4,5) then q23cnt=q23cnt +1;
end;

if q23cnt > 0 and SB024 = 60 then SB024= . ;

q23NeverCnt = 0;
do over ques23;
   if ques23 = 1 then q23NeverCnt = q23NeverCnt+1;
end;

If (NOCNSNT = 2 AND SB035 = 1) then SB048SK = 2 (Asked).

The following explains how the flag variable is used in editing – the codebook page for the edited variable should contain this information:

SB048AU = SB048A, SB048BU = SB048B, SB048CU = SB048C, SB048DU = SB048D, SB048EU = SB048E, SB048FU = SB048F, SB048GU = SB048G, SB048HU = SB048H, SB048IU = SB048I, SB048JU = SB048J, SB048KU = SB048K, SB048LU = SB048L, SB048MU = SB048M, SB048NU = SB048N, SB048OU = SB048O, SB048PU = SB048P, SB048QU = SB048Q, SB048RU = SB048R, SB048SU = SB048S, SB048TU = SB048T, SB048UU = SB048U, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

```
If SB048SK = 1 then do;
      SB048A = .N;
      SB048B = .N;
      SB048C = .N;
      SB048D = .N;
      SB048E = .N;
      SB048F = .N;
      SB048G = .N;
      SB048H = .N;
      SB048I = .N;
      SB048J = .N;
      SB048K = .N;
      SB048L = .N;
      SB048M = .N;
      SB048N = .N;
      SB048O = .N;
      SB048P = .N;
      SB048Q = .N;
      SB048R = .N;
      SB048S = .N;
      SB048T = .N;
      SB048U = .N;
end;
```

.N = (Not applicable)

31. **SB048SPSK, SB048SPU. The following explains how to create the flag variable – the codebook page should contain this information:**

SB048SPSK is an indicator of whether SB048SP were or were not to be asked of a respondent and its initial value is 1 (Not asked). If ((SB048U = 2 AND SB035 = 1) AND NOCNSNT = 2) then SB048SPSK = 2 (Asked).

The following explains how the flag variable is used in editing – the codebook page for the edited variable should contain this information:

SB048SPU = SB048SP, but are unedited for forward coding of non-applicable or missing response values.
Here is how they are edited:

```
If SB048SPSK = 1 then do;
      SB048SP = '.N';
end;
```

.N = (Not applicable)

Appendix G

Frequency and Percentage Distributions for Variables in the Survey Analysis Files

As a cadet/midshipman, which of the below listed values are most important to your professional life at your Academy? Indicate your top three values in order of importance (Mark the most important value in the "1st" column, the second most important in the "2nd" column, and the third most important in the "3rd" column).

SB004A Accountability

SB026SK If you answered "Yes" to the previous question, think about the situation(s) you experienced since June 2004. Pick one situation to tell us about in this section. That situation should be the event that had the greatest effect on you. What did the person(s) do during this situation? Mark one answer for each behavior.-Skip

/*-------------------------------------------------------------------------------------------------------------------------*
This procedure gives unweighted counts of the full database broken out by EligFlgW that can be used to verify that the dataset
has been properly imported.  Use the counts below as a reference.

Eligible          4512
Ineligible         708

Note that the 708 Ineligible are actual nonrespondents, since the real ineligibles never got briefed about the survey, nor
did they enter the classroom to take the survey.
*-------------------------------------------------------------------------------------------------------------------------*/

run;

*-------------------------------------------------------------------------------------------------------------------------*/
This procedure gives the weighted count of eligible & ineligible respondents that can be used to verify that the dataset has
been properly imported.  Use the counts below as a reference.

Eligible weighted         12334

The above mentioned ineligibles/nonrespondents have zero weights in the dataset and therefore the weighted estimate is zero.
*-------------------------------------------------------------------------------------------------------------------------*/

*-------------------------------------------------------------------------------------------------------------------*/
This procedure creates a dataset to hold the stratum totals required by Proc SurveyMeans and thus enabeling Proc SurveyMeans
to apply the finite population correction to variance estimtates.
*-------------------------------------------------------------------------------------------------------------------*/

data sasin.tots;
set sasin.SASA05P(keep=strat _total_);
run;

*-------------------------------------------------------------------------------------------------------------------*/
This procedure runs Proc SurveyMeans.  Proc SurveyMeans uses Taylor series variance estimates and is one of a few procedures
in SAS that applies sample design corrections to the estimated variances.  Most commonly available statistical programs have
little or no capability to compensate for survey sample designs and produce inaccurate variance estimates.

In the example below SB011A, ..., SB011J are the dependent variables.  XACAD are the independent variables.  The results for
XACAD show the estimated eligible and ineligible population totals. Finite population correction is performed using the tots
dataset.

Note that weighted ineligible records need to be included in all domain definitions in order to properly estimate variances
even though the point estimates for the ineligible records may be of no interest.  SAS does provide a macro that enables Proc
SurveyMeans to analyze sub-populations without printing the point estimates of unwanted domains while still include the
unwanted domain information in variance estimates.

Appendix K
Crosswalk of Questionnaire Items

SASA Q #	Question Text	DODIG Q #	Nature of Change
1	To which Service Academy have you been appointed?	1	
2	Are you: male/female	2~	Are you…vs. what is your gender?
3	What is your Class year?	3~	Options are by year one year later than SASA question.
4	As a cadet/midshipmen, which of the below listed values are most important to your professional life at your Academy?	4~	Displayed differently. Also, SASA version has an explanation of how to fill the question out.
5a	Based on experience, extent do you agree/disagree with: adhere to Honor Code, even if know won't get caught for violating it.	5a	
5b	Based on experience, extent do you agree/disagree with: adhere to significant Academy rules even if they know won't get caught for violating them.	5b	
5c	Based on experience, extent do you agree/disagree with: cadets/midshipmen hold others accountable to the Honor Code.	5c	
5d	Based on experience, extent do you agree/disagree with: honesty in all things is expected at my Academy.	5d	
5e	Based on experience, extent do you agree/disagree with: I am morally obligated to abide by the oath I took to support and defend the constitution, regardless of consequences.	5e	
5f	Based on experience, extent do you agree/disagree with: I have felt pressure from others in my Academy to compromise moral standards because of loyalty to friends or peers.	5f	
5g	Based on experience, extent do you agree/disagree with: Felt pressure from others at my Academy to compromise moral standards in order to meet academic or training objectives.	5g	
5h	Based on experience, extent do you agree/disagree with: circumstances determine whether right or wrong for cadet/midshipman to compromise his/her moral standards.	5h	
5i	Based on experience, extent do you agree/disagree with: I am committed to living by moral standards that exceed those of society at large.	5i	
5j	Based on experience, extent do you agree/disagree with: As a cadet/midshipmen, it is important to meet the same exemplary conduct and leadership standards required of a commissioned officer.	5j	
5k	Based on experience, extent do you agree/disagree with: my commitment to living by exemplary conduct and leadership standards has been reinforced by attending the Academy.	5k	

SASA Q #	Question Text	DODIG Q #	Nature of Change
6a	Extent agree/disagree that following behaviors would disrupt good order and discipline at my Academy: violating the Honor Code/Concept.	6a	
6b	Extent agree/disagree that following behaviors would disrupt good order and discipline at my Academy: not reporting Honor Code/Concept violations.	6b	
6c	Extent agree/disagree that following behaviors would disrupt good order and discipline at my Academy: favoritism based on gender.	6c	
6d	Extent agree/disagree that following behaviors would disrupt good order and discipline at my Academy: engaging in prohibited relationships/fraternization.	6d	
6e	Extent agree/disagree that following behaviors would disrupt good order and discipline at my Academy: cadets/midshipmen dating each other at the same Academy	6e	
6f	Extent agree/disagree that following behaviors would disrupt good order and discipline at my Academy: consensual sex between cadets/midshipmen on Academy grounds.	6f	
6g	Extent agree/disagree that following behaviors would disrupt good order and discipline at my Academy: consensual sex between cadets/midshipmen off Academy grounds.	6g	
6h	Extent agree/disagree that following behaviors would disrupt good order and discipline at my Academy: excessive use of alcohol/drunkenness.	6h	
6i	Extent agree/disagree that following behaviors would disrupt good order and discipline at my Academy: illegal drug use/abuse of prescription drugs.	6i	
6j	Extent agree/disagree that following behaviors would disrupt good order and discipline at my Academy: viewing pornography.	6j	
7	Have you had any training since June 2004 on topics related to SH.		
8	How effective was the training you received in actually reducing/preventing behaviors which might be seen as sexual harassment?		
9	Have you had any training since June 2004 on topics related to SA?		
10	How effective was the training you received in actually reducing/preventing incidents of SA?		
11a	Do you understand: difference between SH and SA?	9a	
11b	Do you understand: how to report SH?		
11c	Do you understand: how to report SA?	9c~	Assault vs. assaults
11d	Do you understand: how to avoid situations that might increase the risk of sexual assault?	9b	

SASA Q #	Question Text	DODIG Q #	Nature of Change
11e	Do you understand: how to obtain medical care following a sexual assault?	9d	
11f	Do you understand: how to obtain counseling following a sexual assault?	9e	
11g	Do you understand: services your Academy's legal office can provide to a victim in response to sexual assaults?	9f	
11h	Do you understand: the responsibilities of law enforcement and criminal investigative agencies in response to sexual assaults?	9g	
11i	Do you understand: the role of the chain of command in handling sexual assaults?	9h	
11j	Do you understand: where to go if I need additional information on the areas above?	9i	
12a	Agree/disagree at Academy: men treated more favorably overall.	7a	
12b	Agree/disagree at Academy: women treated more favorably overall.	7b	
12c	Agree/disagree at Academy: men and women treated fairly overall.	7c	
13	Agree/disagree? cadet/midshipmen dormitory/barracks areas should be physically separated by gender.	8	
14a	Extent current cadet/midshipmen leaders: demonstrate good examples of sound moral character?	10a	
14b	Extent current cadet/midshipmen leaders: hold others accountable for their conduct?	10b	
14c	Extent current cadet/midshipmen leaders: promote and safeguard the welfare of subordinates?	10c

14. ABSTRACT

The codebook documents the data collection process, and variable values for the Service Academy 2005 Sexual Harassment and Assault Survey, which was conducted in April 2005. This survey is the second of five congressionally mandated surveys designed to track sexual assault and sexual harassment issues at the Service Academies in response to the National Defense Authorization Act for Fiscal Year 2004. The first survey in this series was conducted in 2004 by the Department of Defense Inspector General.

15. SUBJECT TERMS

INSTRUCTIONS FOR COMPLETING SF 298

1. REPORT DATE. Full publication date, including day, month, if available. Must cite at least the year and be Year 2000 compliant, e.g. 30-06-1998; xx-06-1998; xx-xx-1998.

2. REPORT TYPE. State the type of report, such as final, technical, interim, memorandum, master's thesis, progress, quarterly, research, special, group study, etc.

3. DATES COVERED. Indicate the time during which the work was performed and the report was written, e.g., Jun 1997 - Jun 1998; 1-10 Jun 1996; May - Nov 1998; Nov 1998.

4. TITLE. Enter title and subtitle with volume number and part number, if applicable. On classified documents, enter the title classification in parentheses.

5a. CONTRACT NUMBER. Enter all contract numbers as they appear in the report, e.g. F33615-86-C-5169.

5b. GRANT NUMBER. Enter all grant numbers as they appear in the report, e.g. AFOSR-82-1234.

5c. PROGRAM ELEMENT NUMBER. Enter all program element numbers as they appear in the report, e.g. 61101A.

5d. PROJECT NUMBER. Enter all project numbers as they appear in the report, e.g. 1F665702D1257; ILIR.

5e. TASK NUMBER. Enter all task numbers as they appear in the report, e.g. 05; RF0330201; T4112.

5f. WORK UNIT NUMBER. Enter all work unit numbers as they appear in the report, e.g. 001; AFAPL30480105.

6. AUTHOR(S). Enter name(s) of person(s) responsible for writing the report, performing the research, or credited with the content of the report. The form of entry is the last name, first name, middle initial, and additional qualifiers separated by commas, e.g. Smith, Richard, J, Jr.

7. PERFORMING ORGANIZATION NAME(S) AND ADDRESS(ES). Self-explanatory.

8. PERFORMING ORGANIZATION REPORT NUMBER. Enter all unique alphanumeric report numbers assigned by the performing organization, e.g. BRL-1234; AFWL-TR-85-4017-Vol-21-PT-2.

9. SPONSORING/MONITORING AGENCY NAME(S) AND ADDRESS(ES). Enter the name and address of the organization(s) financially responsible for and monitoring the work.

10. SPONSOR/MONITOR'S ACRONYM(S). Enter, if available, e.g. BRL, ARDEC, NADC.

11. SPONSOR/MONITOR'S REPORT NUMBER(S). Enter report number as assigned by the sponsoring/ monitoring agency, if available, e.g. BRL-TR-829; -215.

12. DISTRIBUTION/AVAILABILITY STATEMENT. Use agency-mandated availability statements to indicate the public availability or distribution limitations of the report. If additional limitations/ restrictions or special markings are indicated, follow agency authorization procedures, e.g. RD/FRD, PROPIN, ITAR, etc. Include copyright information.

13. SUPPLEMENTARY NOTES. Enter information not included elsewhere such as: prepared in cooperation with; translation of; report supersedes; old edition number, etc.

14. ABSTRACT. A brief (approximately 200 words) factual summary of the most significant information.

15. SUBJECT TERMS. Key words or phrases identifying major concepts in the report.

16. SECURITY CLASSIFICATION. Enter security classification in accordance with security classification regulations, e.g. U, C, S, etc. If this form contains classified information, stamp classification level on the top and bottom of this page.

17. LIMITATION OF ABSTRACT. This block must be completed to assign a distribution limitation to the abstract. Enter UU (Unclassified Unlimited) or SAR (Same as Report). An entry in this block is necessary if the abstract is to be limited.
